BREAK THROUGH THE LIMITATIONS OF SPACE STRICT ATTENTION TO DETAIL AND PRECISION

With economic development and social progress, people's requirements for home are no longer just "places to sleep". From traditional flat floors to multi-storeys, to duplexes and villas, people began to pursue a higher quality of life. In this variety of villas, duplexes, many buildings are not installed with elevators, in the elderly, pregnant women, children and the disabled who live in are extremely inconvenient. However, the installation of elevators has high requirements for the overhead height, the depth of the pit, and the width of the parallel, and a large part of these buildings are difficult to achieve elevator installation due to the narrow reserved space.

TUHE N800 series household elevator breaks through the traditional shaft elevator design, it doesn't need to dig a pit. The overhead height requirement is less than 2.3m, and the installation area requirement is less than 0.8 square meters. Any narrow space can be easily owned, meeting your dream of enjoying the elevator. Craftsmanship creates quality and stands out from the fields of high-end private customization, security, and intelligence.

Variety customized decoration, Humanized design

INTERGRATED ALUMINUM SHAFT

The N800 series home elevators are compact and powerful, easy to intergrate into any decoration style. It will upgrade your home and provide you with a warm and free space.

Intergrated shaft for small space

- ◆ No machine room, no pit, no top height requirement, and no need to reserve hoistway.
- ◆ Cover area is less than 0.8 m², and it can be installed in any small space.

Quick prefabricated installation Safe for construction and environment

- ◆ Prefabricated parts for quick installation at site, which are more accurate.
- ◆ Quick installation, only need simple lifting tools and wrenches to complete the assembly.
- ◆ There is almost no waste in construction site, and the production of dust and noise during the installation process is also reduced.

MASTER DESIGN CREATE A QUITE AND BEAUTIFUL LIFE

So as to make the elevator harmoniously match with the home decoration.
Quiet and environmental Elevator to meet your dream of high-quality home life.

Humanized design-experience comfortable life

- ◆ Multi-noise reduction device, soft and slow running, reject.
- ◆ Adopt LED lighting, 15 minutes without use, the elevator will be automatically adjusted to dormant state, and save energy.

Customized design create noble space

- ◆ Customized design according to your home.
- ◆ Multiple decoration for selection.

MULTIPLE SECURITY MECHANISM

The N800 series elevator is based on a unique driving method and combines multiple safety mechanisms, mainly focus on the users' safety, providing strong support for you to take the elevator.

Up and down protection device ensure reliable running

The elevator is equipped with a safety touch panel, which will trigger a protective brake if the movement exceeds a certain range.

Absolute grating position protector

Compared with the traditional wire rope speed limiter, the safety factor is increased to avoid the risk of slipping.

Human infrared monitoring Keep your family safe

A monitoring device is set up on the roof of the elevator car to alarm the accidental stay in the elevator of the family.

Power failure automatic rescue calmly deal with accidents

When encountering power outages and emergencies, the standby power supply can ensure the elevator run automatically to the nearest stop and open the door, so as to let passengers get out safely, which greatly improves the safety.

LET THE SOUND BE STILL

She fell asleep quietly, With a sweet smile on
her mouth, It must be some kind of sweet dream~

MODULAR DESIGN QUICK INSTALLATION

N800 series home elevator is small in size and strong in function, it's easy to integrate into your house decoration and upgrade your home style. It will make it convenient and comfortable up-stairs and downstairs.
